

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

equal to the halfe of PAV , or of pAv ; nor yet qp equal to the halfe of qy , nor qpA to the halfe of qyA ; (*the Triangle qyA will be equal to the Sector LCA (because $ALpy$ is common to both;) and like to the Triangle GCA , and a part of it;* which he thought to have been impossible.

Note

WHat in N°. 54. p. 1077. in the *Answ. to Qu. 1.* is said of the Observation of *Briners*, is to be understood, that the Workmen *think* so, that they make more Salt with the same quantity of brine, at the Full Moon, then at other times, though really they do not, as the Answerer Judgeth by his *Observ.* in N°. 53. p. 1064: Who hath since advertis'd, that 'tis possible at times, when the Pit hath been much drawn first, that then, if without intermission they go on *walling* till the *Full*, they may make at that time more Salt, than at another time, it being well known, that much drawing the Pit, strengthens the Brine.
